[LinkedIn](#) | [GitHub](#)

I am a Software Engineer and Computer Science graduate from PJATK, currently continuing my studies in Information Management with a specialization in IT Systems Architecture. I enjoy solving backend development challenges and have 3 years of experience as a Java Backend Developer, working with technologies such as Spring Boot, AWS, and PostgreSQL to build reliable and scalable solutions. Having experience as both an IT Business Analyst and a Software Engineer allows me to approach software development from a wider perspective, understanding not only how solutions are built but also the business goals and user needs behind them. Alongside my work and studies, I continuously develop my technical skills through personal projects and exploring modern technologies, including AI and agentic development. I enjoy collaborating with others, sharing knowledge, and taking on new challenges that help me grow as an engineer and as a person.

Skills

Category	Details
Knowledge	Backend programming, REST, RESTful, SOAP APIs Object-oriented programming (OOP), Insurance, OAuth 2.0, Design Patterns, Business Analytics, RDB
Programming languages	Java, Gosu (Guidewire), Python, JavaScript
Cloud & Messaging	AWS (Amazon Web Services), RabbitMQ
Frameworks	Spring boot (Data, Security, Actuator, Validation, Web etc.), Guidewire, Hibernate, JUnit 5, Mockito, Angular
Tools	Git, Docker, JetBrains (IntelliJ), Postman, Enterprise Architect, Terminal, Visual Studio Code, GitLab, Confluence, Jira, Bitbucket, Microsoft Copilot, Claude, AI, Maven
Databases	PostgreSQL, SQL, Microsoft SQL Server (PL/SQL, T-SQL basics), AWS storages
Libraries	Lombok, Slf4j, Jackson, Tailwind, OpenAPI, Swagger UI, JWT, SLF4J
Soft skills	Teamwork, Problem-solving, Empathy, Growth mindset, Time management, Creativity, Communication, Responsibility, Elasticity, Purpose-driven, Critical thinking
Languages	Polish (Native / C2), English (Fluent / C1), German (Communicative)

Current Position

Junior Software Engineer | VHV Gruppe

Warsaw, Poland | 11.2025 – Present

- Develop and maintain Guidewire-based (Gosu) insurance solutions, implementing workflows, work queues, and integration components for core entities such as Policy Periods, optimized for high-volume transaction processing.
- Design and implement SOAP and REST APIs, supporting internal and external system integrations through Enterprise Service Bus (ESB) architecture.
- Optimize batch processes and create data change scripts for large-scale operations, including handling migration and processing scenarios involving 3M+ Policy Period records.
- Maintain and troubleshoot enterprise systems including GDV, PDG, SAP ICM, Internal SST (Internal PC, CC integrations), and Self-Service Portal, delivering fixes and improvements across multiple business-critical applications.
- Contribute to Guidewire Cloud Lift & Shift migration by refactoring existing integrations, developing new cloud-compatible components using Spring Boot, and supporting data migration activities as a key developer.
- Apply software engineering best practices (SOLID, DRY, KISS, Clean Code) and utilize tools including IntelliJ IDEA, ReadyAPI, DBeaver (MSSQL), Git, and Guidewire AI Copilot to improve development, debugging, testing, and feature implementation processes. Daily use of English in a professional environment.

Education

Polish-Japanese Academy of Information Technology

Warsaw, Poland

- Computer Science, Specialization: Databases - Engineer (10.2022 – 02.2026, Grade: 5)
- Information Management, Specialization: IT systems architecture – Master's degree (10.2026 – Present)

Professional Experience

IT Business Analyst | Omecon Sp. z o.o.

Warsaw, Poland | 03.2025 – 11.2025

Project: Deposit System for Kaucja.pl (Poland)

- Led business analysis activities for the nationwide deposit return system implementation for Kaucja.pl, gathering, analyzing, and translating business requirements from finance, logistics, and reporting domains into solutions for the development team.
- Established a structured requirements management process, improving communication between the client and delivery teams, reducing misunderstandings, and ensuring better requirement validation.
- Worked closely with senior business analysts to refine analytical approaches, improve stakeholder communication, and ensure alignment between business expectations and technical implementation.
- Created analytical documentation, including use cases, UML diagrams, process flows, and functional specifications using Enterprise Architect, Visual Studio Code (Markdown), GitLab, Jira, and Confluence.
- Supported agile delivery in a high-pressure environment with a legally mandated launch deadline, coordinating requirements and improving collaboration between business stakeholders, analysts, and development teams.

Apprentice as Business Analyst | Bank Pekao S.A. - Banking Champions

Warsaw, Poland | 07.2024 – 12.2024

- Managed IT-business initiatives focused on process optimization, analyzing business needs and translating stakeholder requirements into structured solutions aligned with organizational objectives.
- Collaborated within an agile environment using Kanban methodology, Jira, and Confluence to coordinate project activities, maintain documentation, and support continuous delivery.
- Identified business cases, gathered requirements, and engaged with stakeholders to understand operational challenges, applying analytical thinking and problem-solving techniques to propose improvements.
- Developed and documented AI/ML solutions using Microsoft Azure, supporting model development processes and maintaining technical documentation throughout the project lifecycle.
- Performed data analysis and model evaluation activities using Excel and Power BI, generating insights to support AI/ML model improvements and data-driven decision-making.

Detailed career history available on my LinkedIn profile: [link](#)

Programming Projects

Engineering Thesis – Backend Application

Technologies: Spring boot 3, Java, PostgreSQL, JWT, Docker, Maven, WebSocket, JPA. More details on read README.md file ([link](#)).

Basic E-commerce shop REST API

Technologies: Spring boot 3, JUnit5, Mockito, Testcontainers, JPA, Hibernate, Spring Security, Spring

Engineering Thesis – Frontend Application

Technologies: Angular 20, WebSocket, NgZorro (Components' library)

Spring Boot Habitz REST API

Technologies: Spring boot 3, JPA, Hibernate, Spring Security, Spring

Certifications

- [AWS Cloud Practitioner CLF-C02](#)
- Currently: [Claude courses](#) – agentic development, MCP, Skills, etc.
- Next: Guidewire Associate Certification – InsuranceSuite Developer (By the end of the year)

Interests

Outside of work and studies, I enjoy reading books, running, and going to the gym.

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
